Nitra, Slovakia. Open to roles in Bratislava or remote.

Junior AI engineer who builds software with AI agents and makes sure it works. I co-built Personal Exchange Bot with Claude Code agents: a production Telegram service that helps Russians abroad exchange rubles person to person. My background is in testing: ISTQB-certified, with hands-on QA work on uTest.

Projects

Personal Exchange Bot

Sep 2026 – present

Co-developer in a team of two. Live: t.me/pfxybot. Case study: albalaeff.eu. Private repository, demo on request.

Replaces scam-ridden ruble exchange chats with structured offers, rate comparison, account checks and ratings.

Python 3.14, aiogram 3, PostgreSQL, FastAPI, Docker, GitHub Actions

4,808	173	327	153 of 365
automated tests	screens	merged PRs	commits are mine

- **Version one in two days.** Built the first working version end to end from the spec, from the database and deals to a FastAPI admin with two-factor login, Docker and tests.
- **Issue-driven AI agents.** One headless Claude Code agent per GitHub issue, each in its own git worktree. I built their tooling: environment checks, a screen map, automatic session handoff.
- **Quality and safety.** Test infrastructure and end-to-end tests; CI runs ruff, mypy, pytest and gitleaks. Account checks against spam databases and a risk score with moderator alerts.

Everest: South Route – Climbing Simulator

Nov 2026 – present

Personal project, in development. Preview: albalaeff.eu.

A realistic 2D browser game about climbing Everest by the South route, designed as a trainer that helps prevent deaths caused by mistakes and inexperience. Online co-op for 2–4 players with Sherpa NPCs, scenarios built on real accidents, one realistic difficulty with a full tutorial. Free, in English and Russian.

Experience

QA Crowdtester (freelance)

Jun 2026 – present

uTest, crowdtesting platform, remote

- Exploratory and functional testing of web and mobile apps for real clients
- Reproducible bug reports with clear steps and expected results
- Logs and HTTP traffic analysed in Fiddler and Charles Proxy

Gaming Club Administrator

May 2021 – Jan 2023

Colizeum, Moscow

- Technical support for customers
- Maintenance of gaming workstations and software
- Technical setup for CS:GO and Dota 2 tournaments

Skills

AI engineering
Claude Code, agentic engineering, AI agent orchestration, tooling and handoff for agent sessions

Shipped with
Python, aiogram 3, FastAPI, PostgreSQL, SQLAlchemy

Quality
pytest, Hypothesis, ruff, mypy, gitleaks, exploratory and functional testing, bug reporting, Fiddler, Charles Proxy, Jira

Learning now
Python, SQL, API testing

Certification

ISTQB Certified Tester, Foundation Level v4.0
CaSQB, September 2026
No. CTFL4-2026-02382-CASQB

GitHub Foundations (GH-900)
In preparation

Learning Jira (Cloud Edition)
Course: boards, JQL search

Education

Bachelor's degree, English Studies
Constantine the Philosopher University in Nitra, Faculty of Arts
Sep 2023 – 2027 (expected)
Advanced English communication, text analysis, research, public speaking

Languages

English	B2
Russian	Native
Slovak	B1, full understanding
